Abstract: Growth in Internet retail sales has been hampered by
  consumer fears about the security of information transmitted over
  the Internet and the legitimacy of some businesses that are
  advertising and selling products. Because the Internet is
  not private, many consumers fear that e-commerce
  transactions could lead to credit card fraud and other problems.
  Web site assurance services, such as those provided by the
  American Institute of Certified Public Accountants (AICPA), the
  Better Business Bureau, MasterCard, and TRUSTe, can help reassure
  potential consumers...

...about these assurance seals may be able to advise their organizations on
  how to allay consumer fears and capitalize on e-
  commerce prospects. While this article focuses on the AICPA's
  Web Trust seal, the concepts are applicable to many other programs
